

## Software Engineer Smart Factory m/f/d

### Must Haves

- You have knowledge of C#, .Net Core and the .Net Framework. Javascript - SQL databases are not foreign to you.
- You enjoy agile software development and follow current web trends.

### Nice To Have

- You have experience in Angular and React, ASP.Net MVC.

**It's nice when** Docker, Docker Compose and AWS Fargate are not foreign words.

**APPLY NOW**

## What does a Software Engineer do with us?

- Design, development and integration of interesting software systems
- Takeover of the process from implementation to documentation and testing of the software
- Observing current technology developments and contributing knowledge to the further development of our technologies
- Responsibility for the modernization of our smart modules in cooperation with our team

## What do we do?

**We create the Smart Factory of tomorrow.**

As an expert in IT solutions for digitalization in manufacturing, we enable production companies to realize the Smart Factory. Our products are used throughout Europe. Our customers appreciate our innovations and down-to-earth approach. We work as a team in a family environment that is characterized by appreciation and open to new ideas.

## What we offer you:

### HYBRID WORKING

Whether at your desk in the office or remotely - you decide according to your needs.

### TOGETHER

We coordinate on a daily basis, share our expertise and make decisions together.

### PHYSICAL WELL-BEING

Fresh fruit, hot coffee and water are all inclusive with us.

### COMPANY EVENTS

Whether at the traditional „beer past four „ or at our company parties - here everyone gets his share.

### MODERN WORKING

Comfort and well-being are ensured thanks to our ergonomic ergonomic office equipment.

### FIRST-CLASS HARDWARE

Each employee receives a high-performance computer that can also be used for mobile work.

„Working as equals and collaborating productively are our top priorities.“

## Gregory, 34

### How long have you been with iT Engineering Manufacturing Solutions?

I've been on board since 2010.

### What do you like most about your team?

We are a small, dedicated team and can always rely on each other. That's how we manage to keep a calm head even in stressful situations.

### How have you developed as a software engineer during your time at iT Engineering Manufacturing Solutions?

Through the many insights into other areas and contact with our customers, whether on-site or mobile, I was able to develop personally and professionally and see a lot.

### What are your strengths, what makes you stand out?

I love programming and being able to use different programming languages in my job. At the same time, I always work in a results-oriented way.

### What do you value most at iT Engineering Manufacturing Solutions?

The topics are always exciting and you work on the cutting edge. I especially like the fact that we bring real added value to great companies and the industry with our products and services.
